You have signed a contract to build a garage for the Simpsons. You will receive a \$500 bonus for completing the project within 17 working days. The contract also contains a penalty clause in which you will lose \$100 for each day the project takes longer than 17 working days.

Draw a project network given the information below. Complete the forward and backward pass, compute the activity slack, and identify the critical path. Do you expect to receive a bonus or a penalty on this project?

ID	Description	Predecessor	Time (days)			
Α	Prepare site	None	2			
В	Pour foundation	В	3			
С	Erect frame	С	4			
D	Roof	С	4			
E	Windows	С	1

G	Electrical	D, E, F, G	3			
Н	Rough-in frame	F, G	2			
I	Door opener	H, I	1			
J	Paint	J	2			
K	Cleanup		1			

You are managing a product upgrade project for Bangkokagogo. Given the project network that follows, complete the forward and backward pass, compute activity slack, and identify the critical path. Use this information to create a Gantt chart for the project. Be sure to show slack for noncritical activities.

Given the network below, compute the early, late, and slack time for each activity. Clearly identify the critical path.
